Introduction

Math 553.430 is one of the most important courses that is required/recommended for the engineering-based majors at Johns Hopkins University.

These notes are being live-Texed, through I edot for Typos and add diagrams requiring the *TikZ* package separately. I am using Texpad on Mac OS X.

I would like to thank Zev Chonoles from The University of Chicago and Max Wang from Harvard University for providing me with the inspiration to start live-Texing my notes. They also provided me the starting template for this, which can be found on their personal websites.

Please email any corrections or suggestions to ksriniv4@jhu.edu.
